

The CAL range of Temperature Controllers

The range of Autotuning P.I.D. Temperature Controllers with RS232/485 Communications and Charting & Logging Software

CAL the pioneer of temperature control

CAL is a dynamic modern company and was the first to develop the 48x48mm (1/16[™]DIN) analogue controller in 1976, the first digital controller in 1986, and the first 24x48mm (¹/₃₂NDDIN) digital controller in 1992. CAL prides itself on technical competence, customer support and long-term supply of its range of controllers.

CAL's temperature controllers

These controllers are designed for ease of use, low-cost and reliability in demanding applications. They are already widely used in many industrial applications such as plastics, packaging, drying, ovens & furnaces and laboratory & scientific equipment.

CAL's auto-tune makes P.I.D. control simple, just a few button presses will start the controller's self-tune which automatically selects the optimum P.I.D. values. Also CAL's unique dAC function is designed to minimise the overshoot problem associated with conventional P.I.D. control.

COM

Functionality

- Easy-to-use Auto-tune program
- Simple menu-driven programming
- Full P.I.D. operation
- Single ramp/soak (dwell) program
- Heat-cool operation
- IP66 protection
- CE compliant

Inputs and Outputs

- Thermocouple, PT100 (RTD) & mV
- Two outputs, SSR driver or Relay
- deviation & band
- RS232 or RS485 (retrofittable)
- MODBUS RTU protocol

CALCOMMS™ unique and easy-to-use

CALCOMMS™ charting and Logging software is incredibly easy to use. It is designed to connect up to 128 temperature controllers by RS485 (RS232 is for one controller only) into a standard or industrial PC. This allows the user to program all functions of the controller and to data-log the recorded temperature. Unlike

complicated SCADA software, CALCOMMS™ is a mini-SCADA package that does not need specialist

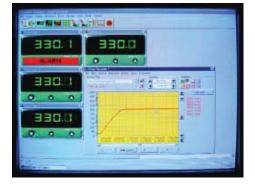

Chart-recorder and Data-logging software

- Log up to 128 controllers
- Windows compatible NT or 95
- Easy to set-up

FREE demo-disk CD demo of CALCOMMS charting & logging

CALCOMMS™ uses

- Easy configuration tool for controllers
- Data-logger for archiving process data
- Chart-recorder for viewing trend information
- On-screen display of temperature
- Software 'on-screen' alarms
- Cloning of controller settings to save time
- Save and re-use applications for multiple controllers
- Remote set-point adjustment

Ideal for:

Recording temperature information for statistical process requirements, quality control or health and safety purposes.

Applications:

Food industry, Dairy industry, Ovens, Furnaces, Kilns, Plastics machines, Laboratory and Scientific equipment, Bottling and beverage production and many other manufacturing industries.

Please ask for the applications guide for installing communicating controllers. CAL's technical manuals are available in French, German, Spanish, Italian and English, both in printed and Acrobat .pdf formats.

- 5-alarm modes, full scale.

Technical Specifications

Resistance Temperature Detector - (RTD) RTD/Pt100

Standards DIN 43760 (100Ω 0°C/138.5Ω 100°C Pt) 0.2mA maximum Bulb current

RS 485 multidrop

connection from PC

to controllers

Linear process inputs

0 to 50mV (0 to 20mV, 4 to 20mV)

Applicable to all inputs (SM = sensor maximum) +0.25%SM +1°C Calibration accuracy: Sampling frequency: input 10Hz, CJC 2 sec

Negligible effect up to 140dB, 240V, 50-60Hz Common mode rejection Series mode rejection: 60dB, 50-60Hz

Temperature coefficient 150ppm/°C SM

Reference conditions: 22°C ±2°C, rated voltage after 15 minutes settling time

Output devices (Maximum 2 outputs)

Solid state relay driver: to switch a remote SSR 5Vdc +0/-15% 15mA non-isolated Miniature power relay Form A/SPST contacts (AgCdO) 2A/250 VAC resistive load

2nd relay (option) Form A/SPST contacts (AgCdO) 1A/250 VAC

Lower (9400 only), 4 digits high brightness orange LED output indicators - flashing SP1 square green, SP2 round red Keypad: 3 full travel elastomeric buttons

Main, 4 digits high brightness green LED, 10mm high

Environmental Safety:

UL 873, EN 61010, CSA 22.2 No. 1010.1-92 Max 80% Humidity: Altitude: up to 2000m

Installation: Categories II and III Pollution: Degree II Protection: NEMA 4X IP66

EMC emission EN50081-1, FCC Rules 15 subpart J Class A EMC immunity:

Mouldings

Flame retardant polycarbonate
